

PRE-GAME PROTOCOL / 30 SECONDS

PRAYER NEURAL WARMUP

A pre-game focus ritual that syncs your eyes, breath, and mindset so you step on the field already locked in.

— WHY THIS WORKS

TRAIN YOUR EYES, BREATH, AND BRAIN AT THE SAME TIME.

This routine started with one of my athletes. He took a vision drill we were teaching him and added prayer, gratitude, and mindfulness on top of it. The results have been mind blowing.

Sports vision is not just about seeing better. It is about syncing the visual system, the nervous system, and the mind so the body can perform under pressure. **When you move your hands and follow them with your eyes while controlling your breath, you are activating three performance systems at once.** Add a moment of gratitude or prayer and you anchor it all to a calm, focused state.

My athlete told me he steps onto the field already dialed in. His attention is sharper. His breath is slower. His mind is fixed on the task ahead instead of the noise around him. This guide breaks down exactly what he does so you can build the same edge before your next game.

"IT HAS BEEN MIND BLOWINGLY SUCCESSFUL.
I FEEL LOCKED IN BEFORE THE GAME EVEN STARTS."

01

SHARPER FOCUS

Trains the eyes and brain to lock onto a target and filter out distractions before kickoff.

02

CALMER NERVES

Slow paced breathing drops the heart rate and clears anxiety from the body fast.

03

BETTER REACTION

Eye tracking primes the visual system so reads and reactions feel natural in game.

04

ANCHORED MINDSET

Gratitude and prayer link the body to purpose, replacing pressure with presence.

— STEP BY STEP / 30 SECOND PROTOCOL

THE FIVE MOVEMENTS OF YOUR PRAYER NEURAL WARMUP

01 CENTER YOURSELF

~ 5 SECONDS

HANDS AT CHEST, SET YOUR INTENTION

Stand tall with your eyes open and a soft gaze ahead. Bring your hands together in front of your chest as if you are about to pray. Take one slow, full breath in through the nose and let it out through the mouth. Drop your shoulders. This is your starting line.

MIND CUE: *Begin a quiet prayer or moment of gratitude. Thank God, thank your body, thank the chance to compete and play the game you love.*

02 INHALE / CONVERGE

~ 4 SECONDS

HANDS IN TOWARD THE NOSE, EYES FOLLOW

Keep your eyes open and your gaze steady. Extend both hands out in front of you. Slowly bring them inward toward the tip of your nose while you breathe in deeply through your nose. Track your hands the whole way with your eyes. Do not let your eyes wander. Feel them converge as your hands come closer.

VISION CUE: *Soft gaze, locked focus. Your eyes should cross slightly as your hands meet near your nose. This is convergence training.*

PHASE 01 / 02

GROUNDING COMPLETE

UP NEXT / EXHALE & RELEASE

You have set your intention and converged inward. Now you reverse the cycle. The next three steps train your divergence, sync your exhale, and lock your eyes onto the field. Turn the page to continue.

CONTINUED / EXHALE, REPEAT, LOCK IN

EXPAND YOUR FIELD, THEN BRING IT BACK.

03 EXHALE / DIVERGE

~ 4 SECONDS

HANDS MOVE OUTWARD, EYES TRACK

Slowly move your hands back outward away from your face while you breathe out through the mouth. Let your eyes follow your hands the whole way as they spread apart. Feel your visual field open up. This trains divergence and primes peripheral awareness for the game.

BREATH CUE: *The exhale should be longer than the inhale. Slow it down. Long exhales calm the nervous system fast.*

04 REPEAT WITH GRATITUDE

~ 15 SECONDS

CYCLE THREE TIMES, STAY PRESENT

Repeat the in and out movement three full times. Hands in with eyes following on the inhale. Hands out with eyes following on the exhale. While you cycle, keep the prayer or gratitude going in your mind. Thank God or your higher power for the chance to compete and to show your abilities.

MINDSET CUE: *Replace pressure with presence. You are not begging for a win. You are showing up grateful for the moment.*

05 LOCK IN

~ 2 SECONDS

SHARPEN YOUR GAZE, FIND YOUR TARGET

Take one final deep breath. Bring your hands down to your sides. Pick a single point on the field, the court, or the ice and fix your gaze there for two seconds. That is your target. You are calm, focused, grateful, and ready. Walk into the game.

FINAL CUE: *No more thinking. No more nerves. The mind is set. Trust the prep. Play the game.*

DIAL IT IN / PRO TIPS

HOW TO MAKE THIS A REAL HABIT.

The drill only works if it shows up the same way every time. Build the ritual, then trust it on game day.

WHEN TO USE IT

Run the routine 5 to 10 minutes before warm-ups. Use it again right before tip-off, kickoff, or first pitch when the nerves spike.

HOW OFTEN

Daily. The brain learns through repetition. Run it 5 days a week minimum, even on off days, so the body knows the pattern under stress.

MAKE IT YOURS

My athlete added prayer and gratitude. You can use scripture, a verse, a mantra, or simple thanks. The personal anchor is what makes it stick.

QUIET SPACES WIN

A locker room corner. The dugout. Behind the bench. Even sitting in the car. Find a spot where you can run the full 30 seconds without distraction.

SLOW IS FAST

Do not rush. The slower you move your hands and breath, the more powerful the calming effect. Aim for 30 to 45 seconds total, not less.

TRACK YOUR WINS

Note focus, calm, and game performance after the routine for two weeks. The data will show you what your body already knows.

READY TO TRAIN YOUR BRAIN LIKE A PRO?

The Prayer Neural Warmup is just one drill. The full system is the [NeuroVision Edge Digital Program](#), a 26-week brain and vision training experience built for athletes who want elite-level focus, reaction time, and on-field awareness without leaving home. Every week unlocks new drills, science-backed protocols, and progress tracking so you can see your gains in real time.

- ✓ **26 Weeks** of progressive vision and neuro training
- ✓ **Pre-Game Protocols** for focus, reaction, and lock-in
- ✓ **Founding Member Pricing** locked for life, never raised
- ✓ **Mobile Friendly Platform** train anywhere, anytime
- ✓ **Weekly Drill Drops** with video walkthroughs and cues
- ✓ **Progress Tracking** built around real performance data
- ✓ **Direct Access** to Dr. Shah for founding members only
- ✓ **Built For All Sports** from baseball to combat sports
